Work Experience

CHEMIST

Alpha Analytical • 2016 - Present

- Prepared standards used for analysis
- Interpreted data and associated QC and approve data in the LIMSsystem
- Built collaborative relationships with the groups to understand their processes and quality needs
- Ensured that laboratory database (LIMs) meets customer needs; SQC requirements are met, specifications are updated, testing schedules are accurate, resources are adequate, and interfaces such as OSI PI are functional

CHEMIST

MetLife • 2015 - 2016

- Developed computer models for simulation of drug binding
- Developed and executed validation of analytical systems
- Operated spectrophotometer and viscosity meter for QC
- Managed decisions regarding personnel issues to ensure that the rules of the collective bargaining agreement are being followed
- Applied cGMP concepts in association with department specific responsibilities
- Assisted with keeping well-maintained and clean laboratories

Skills

- Laboratory Equipment
- Stability Samples
- Data collection and analysis
- ION Chromatography
- Raw Materials
- Uv/Vis
- GC
- Hplc
- Report writing
- Interpersonal skills
- Time management
