Jacob Salstrand
Human Resources Manager
31.07.2019

Dear Jacob Salstrand,

I am a former active duty Marine seeking to grow as a professional. With my interpersonal skills and impeccable attitude, I feel I can be of value to an industry- leading company. I possess a vast array of experience, including management, equipment repair and leading industry practices; I encourage you to give me an opportunity to be a part of your team.

At my previous job as an Aviation Structural Mechanic, I have supervised 25 or more marines, to achieve quality maintenance without jeopardizing safety to themselves or the aircraft. My occupation specified that I formed intricate parts to repair existing damage from raw material ranging from composite materials to a vast array of metals, including aluminum and titanium. I have experience in numerous varieties of fasteners, including rivets, hi-torque screws, blind rivets, hex driven twist locks, hi-grade nuts and bolts.

My aviation background also includes extensive experience in hydraulic, pneumatic, and cable-driven actuators and subsystems. With these skills, I am able to troubleshoot malfunctions and provide solutions to proper repairs. I utilized tools such as die grinders, precision calipers, sheet metal brakes, hammers, rivet guns and bucking bars, and pneumatic drills to produce close tolerance quality work, built to specifications to the F-18 Hornet platform.

Through my superior leadership skills and a keen eye for detail, I achieved quality aircraft maintenance without injuries to my crew or loss of life due to a downed aircraft.

Thank you for taking the time to review my resume.

Looking forward to speaking with you soon,

Tom West
