## ELECTRICIAN

4607 AUSTIN AVENUE, BAXLEY, GA 31515 | CELL: +1 912-339-2841 | EMAIL: DANJ@RESUMESBOT.COM

### SUMMARY:

I can perform electrical tasks in industrial, residential and commercial environments. I have knowledge of single and three-phase electrical systems up to 4160v. and I'm familiar with troubleshooting PLCs, VFDs and motor controls. Also, can install and wire up motors from 120V- 480V. Furthermore, I've built electrical boxes from blueprints for CNC's and other industrial machinery. Strong work ethic and willing to work overtime if needed. Uses hand tools and testing equipment with ease.

### SKILLS

- Knowledge of National Electric Code. Troubleshooting complex control systems.
- Electrical equipment maintenance Pipe. installation expertise.
- Valid Georgia state driver's license AC/DC control circuitry.
- Exceptionally detail-oriented Hand and power tools.
- Flexible schedule Strong and agile.

### EDUCATION

#### Associate of Applied Science in Electrical maintenance

VATTEROTT COLLEGE, QUINCY, IL

### PROFESSIONAL EXPERIENCE:

#### ELECTRICIAN

C.W. HARRELSON ELECTRIC, BAXLEY, GA | AUG. 2016 - PRESENT

I Am an Electrician with this company and am apart of the install of electrical equipment and repair.I troubleshoot grain bin augers, sweeps, fans, unloads at a farm or grain facility. This is not the only type of electrical work I have performed though. It can vary anywhere from Industrial, light residential and commercial. I am also involved in wiring up starters with multi push button locations and contractors for large lighting loads. Other forms of electric work I have done is installing Romex, MC cable, motor install, pulling wire of all sizes with the help of a cable puller and fish tape, troubleshooting electrical devices

#### ELECTRICIAN

HARCROW ELECTRIC, BAXLEY, GA | APR. 2013 - MAY 2016

I was a sign installer and did maintenance on signs. I repaired old electrical wiring and helped install new signs using an 85-foot Elliot crane. I also used an auger truck to dig the holes for new sign installation work. Replaced old ballasts and capacitors for pole signs.
