## EDUCATION

Bachelors of Science in Electrical Engineering.  
Expected Graduation 2020

## EXPERIENCE

### INTERNSHIP

- Worked under the direction of senior engineers.
- Performed research and laboratory testing on new materials and existing product.
- Assisted in the preparation of engineering calculations, specifications, and designs.
- Worked on a variety of tasks associated with project reporting, such as tracking and evaluating project activities, project progress, and associated data.
- Participated in power distribution designs and the preparation of specifications for the procurement of major electrical power equipment.
- Create drawings from sketches prepared by the engineering staff. These drawings consist primarily of electrical ladder diagrams, interconnection wiring drawings, point-to-point diagrams, control panel layouts and detail drawings.
- Reviewed and interpreted electrical specifications.
- Organized and maintained all required drawings, records, documentation, paperwork, etc.

## SKILLS

- Fluent in engineering problem solving.
- Can communicate ideas and concepts well.
- Comfortable and fluent in basic computer skills including Word and Excel.
- Self-starter and results oriented.
- A level of understanding and experience in CAD/3-D skills.
- An understanding of the practical application of electrical engineering and technology, including applying systems, principles, techniques, and procedures to a project design.
- Experience in Circuit Analysis and Signal Processing.
- Proficiency in Microprocessor Systems, Design, Simulation, Modeling and Identification.
