Dr. Kim Morgan

September 26, 2019

Dear Dr. Morgan,

Thank you for agreeing to consider my candidacy for the Physician Assistant open position.

While researching your Clinique, I was happy to discover that you put an emphasis on learning and development to help your employees achieve their career goals. That is exciting to me as I am always looking for ways to enhance my current skills and obtain new ones.

My background includes a Bachelor's degree in science with the completion of an accredited three-year Physician Assistant Program at Marquette University with an extensive clinical year that has encompassed several different areas of clinical practice.

I have been practicing as a Physician Assistant since June of 2013. I spent 4 ½ years in orthopedic spine surgery where I split my time between the operating room and clinic. I also saw and treated a variety of general orthopedic conditions from on-call cases. I have been exclusively practicing Interventional pain management since December of 2017. I am procedure-oriented and have extensive training and experience with intraarticular injections, including sacroiliac joint injection, utilizing both fluoroscopic guided and blind techniques. I also have extensive experience with tendon/ligament, bursa and trigger point injections. I received additional training and certification in interventional pain management and injection therapy of the lumbosacral, cervical spine and extremities. I am DATA 2000 waiver trained and can provide medication-assisted treatment for opioid addiction, up to 100 patients monthly.

Currently I'm working part-time for BayCare Clinic Physicians in the Emergency Department, main site Menasha, WI.

I hope you will consider my skills as a proof that I am a suitable candidate for this position. Thank you for your time.

Sincerely,

Bobbie Dunn
