Dear Mr. Smith,

When I have researched job openings I paid attention to your request. I was appealed to it because of the perks that you suggest.

I am a high-skilled developer with over 10 years of experience in IT. On my previous job I successfully developed HTML templates for our customer-facing email programs and databases using SQL/PSQL, tested and troubleshot all Web functions to ensure optimal user experience.

Also I have a Bachelor's degree in Computer Science from New York University. I am a proven team player, which is another important requirement for this position. Management also recognized my accomplishments in meeting project deliverable deadlines over 99% of the time, exceeding expectations by 5%.

Thank you for taking the time to review my resume and cover letter. I am looking forward to answering your questions and learning more about this position and your development teams.

Sincerely,
Alan Beer
